

Library Vital To Learning

Daily use of the school's library makes learning a more meaningful experience for many Bitburg students. Students use the library before school, during lunch periods, after school and during the regularly-scheduled day. Whether it's an upperclassman doing a research paper or a Middle School student writing a report, plenty of volume are on hand for use.

Developmental Reading Given A Priority In USDESEA Schools

The reading program, both developmental and remedial, have been raised to a priority in the USDESEA school system. Bitburg High School had an easy time meeting this requirement. Reading had been emphasized in the school in 1974 and a reading specialist, Mrs. Lucille Paine, was already in the school. She expanded her program to meet the requirements of USDESEA and the challenge of the students.
