Extracurricular activities are an integral part of the total school program. Students are encouraged to become active participants in these special programs.

Statistics show that students who participate in extracurricular activities make better grades, attend school more regularly and follow school discipline codes. The associations and friendships made while participating in these activities often last a lifetime.

From treading the boards in Drama to the solemn pace of Drill Team; from travel to The Hague to competing for scholarship money in a speech contest...all such activities provide memories to last a lifetime.
